PROJECTS

Todo Project ⬈
- This is a Todo project designed to help you track future tasks. Once a task is completed, it will be marked as done. This project helps manage tasks by allowing users to add, track, and mark tasks as complete. It ensures efficient organization and progress monitoring for future work.

Amazon ⬈
- This project is a replication of the real Amazon web page. It aims to mimic the functionality and design of Amazon's website, including features such as product listings, search functionality, user authentication, and a shopping cart system.

Movie Review ⬈
- This project fetches movie reviews from a database or API and displays them on the browser. Users can view detailed reviews, ratings, and summaries for various movies.

Movie Catalog App ⬈
- Discover and manage your favorite films with our Movie Catalog app. Effortlessly browse, organize, and review movies—all in one convenient place.
